

The Digital Transformation Expert Guide Part 3

Lee Morris, Operations Manager

In case you missed the **second** part of our **expert guide** series, we chatted to Glen Thorne, Head of Operations Development. about the range of solutions available to empower and support both care providers and residents.

In our third part of our **expert guide** series, Lee Morris, Operations Manager at Tunstall Healthcare, speaks about the journey of creating a digital care system and the additional services available to help meet the care requirements of those who need it most.

Tunstall's installation team offers a full, end-to-end solution for a wide range of systems throughout the UK. Starting with a detailed site survey, we work closely with our customers to understand their requirements and think creatively about how we can design a system that will best meet the needs of the people using it.

Although Tunstall is a market leader, not everyone knows that we also install and commission a variety of other building system solutions outside our core market, such as:

- 1. Electrical works to NICEIC standards
- 2. CAT6 networks for digital door entry and Wi-Fi access points
- 3. Fibre backbone cabling
- 4. Apartment fire detection to BS5839 Part 6 standards
- 5. Emergency Voice Communicators to BS5839 Part 9 standards
- 6. Mechanical and natural smoke extraction systems and CFD modelling where required
- 7. Fire curtains
- 8. CCTV
- Access control solutions
- 10. Tunstall is BAFE approved, so we can design, install, commission and service landlord fire alarms systems to BS5839 Part 1 standards

Tunstall is so much more than just the company that supplies the red pull cords!

Tunstall also supports its customers throughout all stages of a project lifecycle, with PRINCE2 trained contract managers that have almost a hundred years' experience between them. And, of course, the installation team are DBS checked and ECS or SMSTS trained where required.

The work Tunstall does makes a real difference, and I'm privileged to see the ways we make people's lives better every day. It makes coming to work a pleasure.
