## Product Data Sheet

# Big Button Phone

### What is it?

The big button phone is an analogue telephone specifically designed for people with limited dexterity, hearing or visual impairments. This telephone has large black button keys with white numbering, which are the colours recommended by the RNIB in order to maximise contrast making it easy to use, particularly for the visually impaired services.

### Who is it for?

It is ideal for those with limited dexterity or hearing and visual impairments or anyone that has difficulty using a standard telephone.

### How does it work?

Specifically designed to provide an easy-to-use telephone, the Big Button Telephone works like any traditional phone but with improved usability for people with hearing or sight impairments as well as those suffering with dexterity issues.

The phone also offers last number redial, timed break recall and mute ringing functionality through an integrated LED.

## Features and Benefits

- **Incoming call indicator** – a bright LED alerts the user to an incoming call
- **Large keypad** – large black buttons with white numbers support people with visual impairments
- **Last number redial and timed break recall** – improves user experience, especially for care providers haing to make multiple calls
- **Table or wall mounted** – allowing the phone to be positioned at the user’s preferred location

## Manufacturer’s Specification

### Technical

**Dimensions (L x H x W):** 200 mm x 85 mm x 75 mm

### Standards

**CE:**

Compliance confirmed by manufacturer.

### Part Number

30000/54

### ABOUT TUNSTALL HEALTHCARE

Tunstall has been at the forefront of technology innovation for the health, housing and social care markets for over 65 years. Its pioneering software, hardware and services enable providers to deliver integrated, efficient and person-centred care in the community, and empower people to live independently and with an improved quality of life.

Tunstall works with social care providers, healthcare services, housing and retirement living providers and charities in 18 countries, improving the lives of more than five million people, including those living with dementia, learning disabilities, physical disabilities and long-term health conditions.

As technology advances and solutions become increasingly digital and cloud-based, we will work closely with our customers and partners to enable them not just react to events, but to predict and even prevent them, using data-driven insights. Our focus is on creating a more connected world that fulfils the potential of technology to offer intelligent care and support, and give people greater choice and control about how they live their lives.
