173MHz Amie Pendant

Discontinuation Notice

Dear Customer,

Please be advised that product P63000/02 (173MHz Amie pendant) is now discontinued with no replacement.

Originally designed for warden call systems which have not been installed for almost 25 years, this product has remained available to support our existing customers.

We still hold limited service stock; however, no further manufacturing will take place, therefore once remaining stock is depleted, it will no longer be available.

Given the age of warden call systems that still use 173MHz radio telecare, we recommend contacting your Tunstall account manager to explore upgrade options that ensure ongoing service and support.

Yours sincerely,

Tunstall Customer Support
